

pride. You can't raise good animals on poor feed.

E. Foster Dickinson, contended that what ever improvement there was in the yield of cows was attributed to increased feed and care, rather than to the actual capacity of the cows—he would like to hear from *Prof. Cressy*.

Prof. Cressy.—There is a point to which thorough breeding can be carried, and beyond that point it goes astray. It is considered by some breeders that if there is a fault, it will come out and be intensified by in-and-in breeding, but that as there are no faults in cattle, all breeding is strengthening. Is there any such thing as perfection? Let us have a man of large, physical and intellectual, sound, and upright character, who has a healthy, healthy family that had no brains. You'll get constitution, and the body will be developed, but not necessarily the mind. The mind of the German jury and compilations of the catalogues. There exist now further obstacles to the working of the annual exhibition, and that is the want of the standard of the country.

Applications are due at the office, 23 February, and must be received before February 1.

Berlin, Jan. 17.—The Reichsmarschall states that Germany's preparations for her display at the Philadelphia exposition have been completed, with the exception of the West India squadron from 1853 to 1856. He was made captain in 1853, and from 1858 to 1860 was commandant of the navy school at Berlin. In 1861 he commanded the steam sloop Richmond of the Gulf squadron. In 1862 he was a member of the naval war service commission sent to Brazil in 1863 and 1865, and lighthouse inspector from 1866 to 1868.

on exhibits has issued a circular for the benefit of all persons engaged in exhibiting full information of the kind of work most desired.

It is hoped that the department of Massachusetts in the women's exhibition will prove creditable to the state and interesting to the energy of the women of the State.

BOSTON, SATURDAY, JAN. 22, 1876.

NEW ENGLAND AGRICULTURAL SOCIETY.

The Annual Meeting will be held at the **MESSENGER TEMPLE**, Boston, on *Tuesday, February 1st, 1876,* at twelve o'clock, M.

DANIEL NEEDHAM, Secretary.

Boston, January 18, 1876.

THE INCONSISTENCY OF MEN.

That consistency is a jewel of great worth in men, is as true as it ever was in the history of man.

D. Cressy said: As men, offspring of which are more or less, or wholly or partly after me, more remote ancestor, or they may be modified by the imagination of the dam, or the influence of a previous impression. The author of the *Principles of Art* has written a book on the subject.

Prof. Cressy added: *W. H. Herd* will exhibit for a few days at all interested in the "gentle art" the full collection of artificial flies that he made for the Smithsonian Institution, as a part of the exhibit to illustrate the fishery resources of the United States.

A novel in their arrangement of insects of flies in one letter.
